

## Why Does My Body Smell Assessment

For this assessment you will create a poster that:

- Identifies the three types of germs we have studied and name what problem that can be caused by each (example, athlete's foot is caused by a fungus).
- Explain how a cavity is formed (a detailed description, not just by eating sugary foods and not brushing teeth).
- Explain how germs can spread, and how they get inside our body.
- Explain how you can help prevent the spread of germs.
- Have a drawing that pertains to the information
- Label and title information.
- Make poster attractive

Have Fun! 😊
