

# **NASC209 Physical Geology**

Date 01/29

Sample tray number 2

Original Investigator's name Mallory Fletcher

## **Description** of sample:

- Shiny
- Smooth
- Sharp edges
- Looks like the material you would find arrow heads being made of.

**Speculate (hypothesize!) on how the sample may have been formed or acquired its present appearance.**

It was formed layer by layer (can be seen in the lines it has formed within its structure)

Pair partner's name Wyatt

## **Description** modifications w/ pair partner:

- Flint like

## **Formation speculation** modifications w/ pair partner:

Could be metamorphic
