

NASC209 Physical Geology

Date 1/29/20

Sample tray number 4

Original Investigator's name Carlman Daves

Description of sample:

Small-ish, gold & shiny.

has layers some cracking apart.

Some orange-rusty spots

Sharply fractured off pieces, but has been worn down

Speculate (hypothesize!) on how the sample may have been formed or acquired its present appearance.

I think it is sedimentary.

made from years of layering

Pair partner's name Kayla Waynard

Description modifications w/ pair partner:

sparkling on top + bottom but not on sides

rusty pigment

Formation speculation modifications w/ pair partner:

sedimentary made by layers
