

NASC209 Physical Geology

Date 01/29/2020

Sample tray number 21

Original Investigator's name Morgan M.

Description of sample:

o Speckled Grey, black and Red orange spots

o Small, pebble size

o Smooth texture

o Reflective surface spots

o Not completely round (there's a slope on one side)

Speculate (hypothesize!) on how the sample may have been formed or acquired its present appearance.

- o pressure from being buried under soil caused the red orange spots to form?

Pair partner's name Dinah G.

Description modifications w/ pair partner:

o Smooth w/ slight bumpy

o Sparkle on black (reflective)

Formation speculation modifications w/ pair partner:

Softer Sediment to form indentations.
