

FYS-1FS-G: MINDS, ROBOTS, AND THE END OF HUMANITY
MANCHESTER UNIVERSITY – FALL 2017

By the end of the second full week of classes (September 15), you need to talk to a professor in your intended major. The name and office location of the person you are supposed to talk to will be given to you during your first advising meeting. When you talk to that professor do the following things:

- Email or talk to the professor after class to set up a time to meet. In the email explain that you want to meet to talk about your major and ask what the professor's office hours are.
- Show up on time and introduce yourself: Tell them your name, that you are a first year student, and what major you are interested in.
- Ask them the following questions and write down notes about the answers.
- Thank them when you are done with the questions.

Your name: _____

The name of the professor: _____

(If you have two professors, then you will need two sheets: one for each professor.)

What student clubs does your department have? Who should I contact to get more information about those clubs?

What do students who major in my area usually do after graduation? If it is a job, what kind of job? If it is graduate school, what programs and what schools?

What is something I should do or need to do as a first year student to help me be successful in this major?
