

No rules

3-20-12

Cause and Effect

If there were no rules, I would rule the world. But no rules means no peace, no democracy. The world would end!

main point { If there ^{were} ~~are~~ no rules, all the people in prison and jail would escape. Thousands ^{would be} dead and still to come that would be the end. We would have to literally fight for our lives. The streets ^{would be} littered with dead bodies and stuff on fire. There would be more devastation than the twin tower attack!

main point { The only thing that runs this world is rules. ^{Having} ~~Don't you see,~~ no rules means that the only leader would be the person with most power. Our government would fall apart, not to mention a nether stock market crash.

The world ^{would} ~~shall~~ end with no rules. Now listen up! I will tell you ^{for the} last time ~~!~~ there must be rules. If we have no rules, we will die! I would wright more but they are breaking down my door. Please restore order before it's too late!

Who?

- Some good vocab words
- Clearly written, although many small errors should be fixed
- Add another idea with supporting examples - maybe
