

Presentation Handout

Directions to Students:

- Explain to the students that each group will share their ecosystem in a box to the class. Tell the students that each group member must participate by informing the class what their job was and what they found while researching information relevant to their job title.
- Have a table for students to place their final project on while they are talking to the class.
- When it is time to share select one group at a time to come up in front of the class.
- First, have the group show their ecosystem in a box to their classmates. Have the students explain what they included in their box.
- Second, have the group sit their ecosystem in a box down on the table while they speak. Have each student explain what they found while researching information on their job title. Once the group is finished sharing have them returned to their seats and select another group.
- After all groups have shared tell the class to give themselves a round of applause for a great job.
