

## ExamView Implementation

Goal: to administer one test online before the end of the 2011-2012 school year.

Teacher Name: Beyhan

Subject: Spanish 3b

Period: 1

Please provide a brief summary of the test administration (what went well, what went wrong, opportunities for improvement, feedback from students, overall impression).

Test Date: Wednesday, May 2, 2012

By: Stephanie Hofer → 1st Period → Spanish 3B

\* 3 students' tests did not open properly

\* 4 students' tests did not save scores properly

\* Our mean class score was a 54.2%. Normally, our class averages are much higher for tests. Students stated that the test was very challenging and that the format threw them off. Unfortunately students that normally ace tests in this class received very low scores.

Overall, the idea of ExamView is helpful for teachers. However, for a foreign language class this is a challenging program. I almost felt limited in what I could test them on, as an essay or completion question is not easily doable through ExamView. If the program would allow for other questioning techniques besides Multiple Choice, this would be a great program to prepare students for computer-based standardized assessments.

Please provide an Assessment Summary generated by ExamView.

Please submit this form as well as the Assessment Summary electronically to your Department Chairperson upon completion (by May 30, 2012).
